

Metalbind®

OPUS the binding company

The most recognized binding system in the world.

Secure

Protecting your documents by clamping them between covers with a robust Metalbind channel to keep them safe.

Universal

Coping with many types of original documents, maps, plans thick or thin, without fear of damage between covers solid or clear by a Metalbind channel, plus easy to de-bind with our special tool. No punching, no gluing.

Popular

Used all over the world by small businesses to corporations, universities, schools and local governments for presentations. Storage of precious documents always looking perfect when needed.

Elegant

Interchangeable impressive colourful covers, with or without windows, hard, soft or clear, richly embossed with gold or silver. Makes your presentations or reports stand out from all the others.

Rugged

No fear of losing documents or misshaped presentations, using time after time lasting for a long time.

Patented system:

1. The back of the channel is bent in to hold covers and pages firmly.
2. The channel is lined with a special tape and then covered with embossed linen textured covering ready for hot print stamping.
3. The special shaped channel gives a perfect presentation of the documents.
4. No damage to pages by the channel.
5. The front face of the channel is never deformed.

Patented COVERguide®

The special COVERguide system allows covers and documents to slide easily into the channel.

Special protrusions each end centres the document in the Metalbind channel precisely and protects against movement.

The design of the edges make the covers fit perfectly into the channel.

OPUS MB 300

Documents bound and embossed by using OPUS Metalbind & Goldcover machines.

OPUS MB 300

The METALBIND MB300 is the flagship of OPUS binding machines for professionals.

Solid metal construction, ergonomic lever, power pressure indicator and ability to bind and debind up to 300 sheets of 80gsm paper makes it the favorite model of every copy shop in Europe.

Pressure indicator for large binding runs of documents gives a signal when the correct pressure for Metalbind channel is reached to avoid damage. 10 pressure levels, angled bed for ease of use, front binding slot.

You can easily bind thesis books, photobooks, business books, e.g. tenders, reports, proposals and much more in a few seconds.

OPUS MB 300-el office

The METALBIND MB300-el office is an electric easy-to-use binding equipment, which binds and debinds documents up to 300 sheets of 80gsm paper.

One movement of the lever holds the channel in place and then binds your documents by pressing the buttons. Adjustable binding force and the LED display indicating binding pressure up to 2.3 tons. COVERguide system helps work fast when binding many documents.

OPUS MBE 300

Electric version of the most popular Metalbind MB300 binding machine. It binds and debinds up to 300 sheets of 80gsm paper with ease and speed. The LCD display shows binding speed along with information regarding number of documents bound.
